Strong foundations.
More dependable execution.

An evidence-based pathway for cross-team work, fair people decisions and a better employee experience.

327 response records · 30 rating items · 1,892 comments

30 OCTOBER 2026 / TISS

Source: Your Voice master survey; analysis snapshot 29 October 2026.

Preserve pride. Improve coordination. Make people decisions clearer.

Two improvement priorities, supported by three everyday management practices.

PRESERVE

Pride and mutual support

92.4% company pride; 91.1% help within own team.

PRIORITY 1

Make cross-team execution dependable

45 records: own-team support favourable, cross-team work rated 1–3.

PRIORITY 2

Make people decisions consistent and explainable

74.6% favourable on decision consistency; 75.5% on understanding decisions.

Proposed response: one cross-functional workflow and a defined set of pilot roles, reviewed over 90 days.

Source: item_evidence_profile.csv; paired_team_support_comparison.csv; final_focus_evidence_and_actions.csv.

Start with the response base

Describe the supplied records before drawing organisational conclusions.

327	30	1,892	321
Response records	Complete rating items	Nonblank comments	Comment contributors

SCORING

1–2 Unfavourable
3 Sometimes
4–5 Favourable

READING THE EVIDENCE

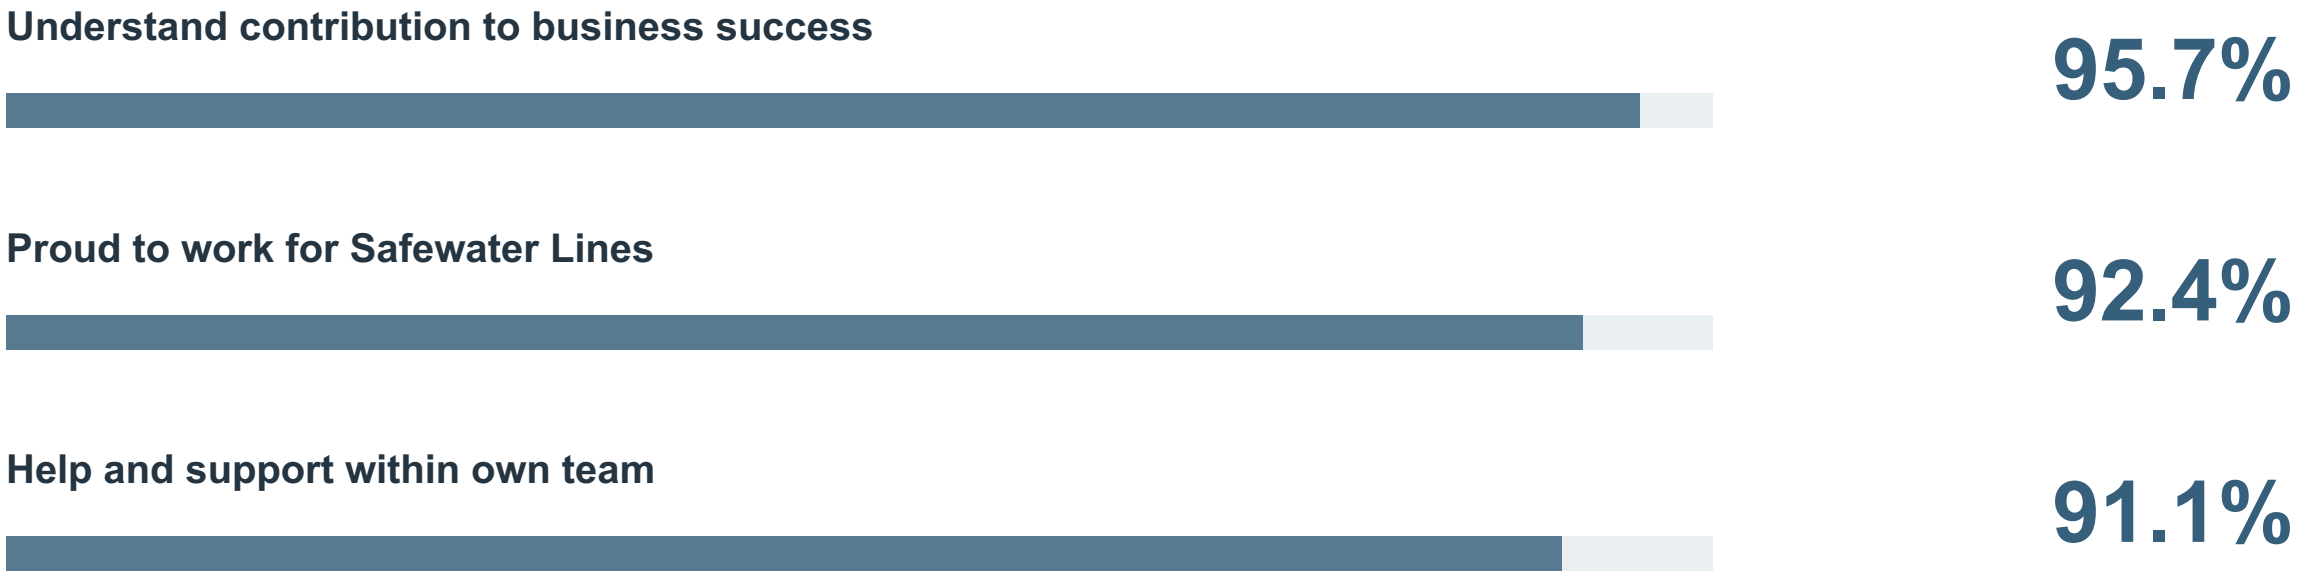

9,810 valid item answers; 84.9% are favourable.
No eligible-workforce denominator is available.
Comment coding is interpretive; human validation remains.

All findings describe the supplied response pool. No response-rate or workforce-wide prevalence claim is made.

Source: survey_clean.csv; codebook.csv; qualitative_coding_coverage.csv; assistant_review_status.csv.

Pride and helpful colleagues are assets to protect

Improvement should build on what employees already value.

119 records mention team/colleague strengths in the preserve prompt. Use pride and own-team support as guardrails.

Source: item_evidence_profile.csv (PRI2, PRI1, CAM1); employee_voice_topic_summary.csv (preserve topic t).

Fairness is the weakest survey block

Favourable item-answer shares show where further diagnosis is useful.

SURVEY BLOCK	FAVOURABLE SHARE / 0–100%	MEAN / 5
Pride	91.2%	4.58
Overall experience	89.4%	4.48
Credibility	84.8%	4.35
Camaraderie	83.3%	4.35
Respect	82.6%	4.32
Fairness	**78.2%**	4.17

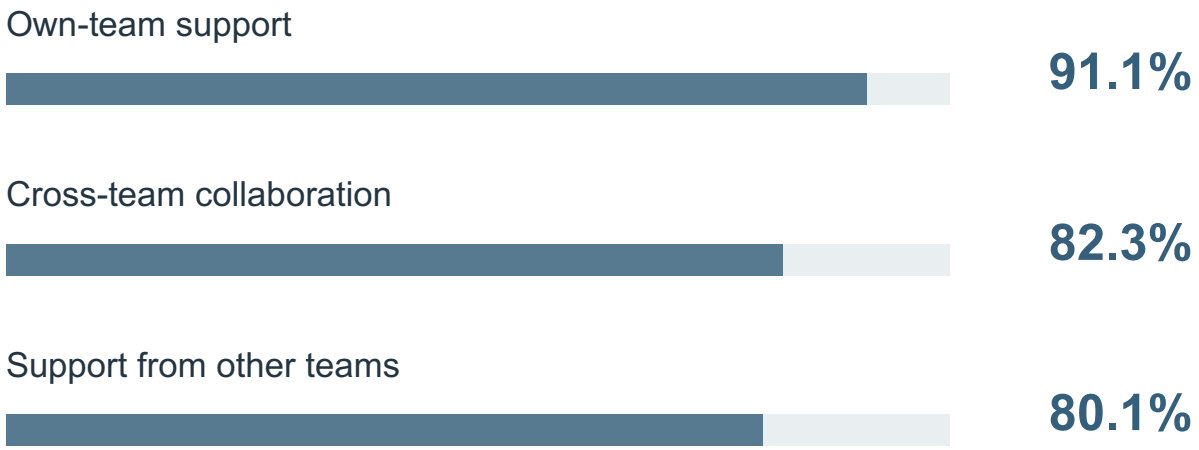

Overall experience is a separate block. The 25-item culture mean is descriptive, not a validated engagement index.

Source: survey_clean.csv; five items per block; 1,635 valid answers per block; equal-weight working means.

Helpful colleagues do not guarantee smooth cross-team execution

Compare own-team support and cross-team collaboration in the same response records.

FAVOURABLE SHARE

45

Own-team favourable; cross-team 1–3

13.8% of all 327 records; 16 show the reverse.

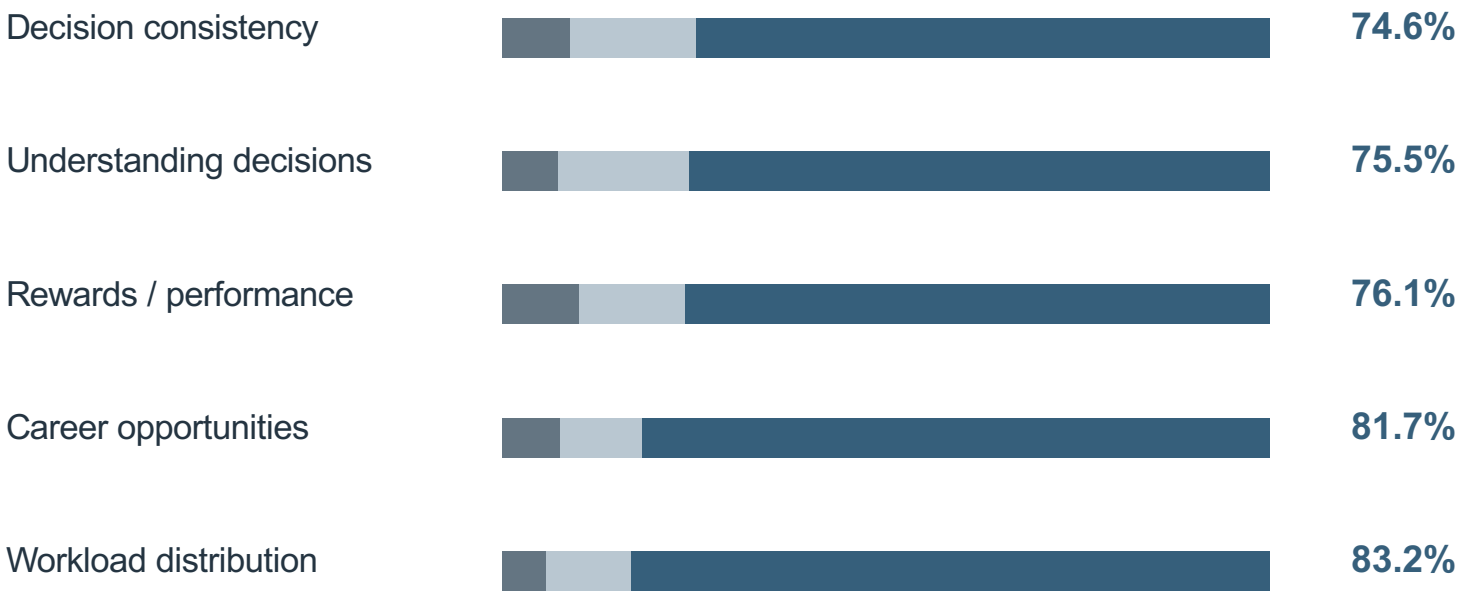

Own-team / cross-team	1–3	4–5
1–3	13	16
4–5	45	253

The 8.9-point difference is descriptive. The next step is to verify handovers, receiving ownership and backup.

Source: cross_team_deep_dive.csv; cross_team_paired_detail.csv; CAM1 × CAM2; n = 327.

Consistency and explanations deserve a closer look

Keep Sometimes separate from an unfavourable response.

137 / 327

At least one fairness item rated 1–3

97 / 327

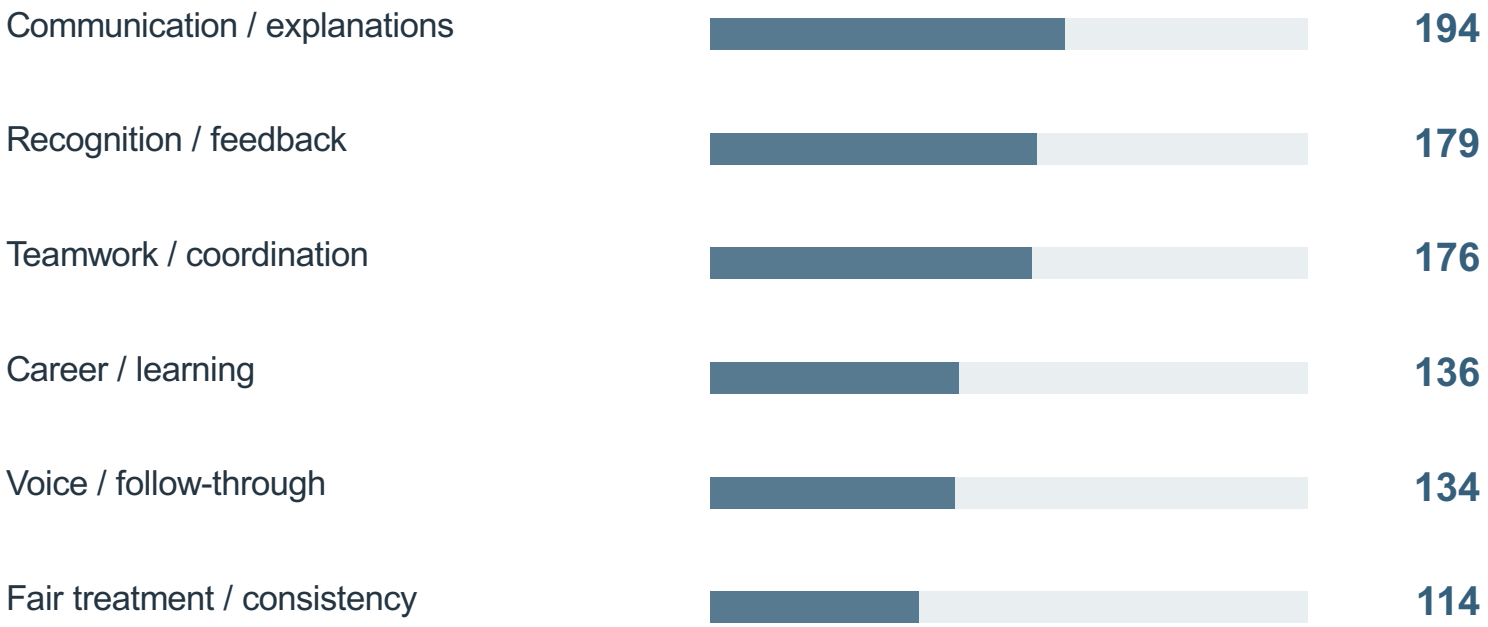

Two or more fairness items rated 1–3

1–3 includes Sometimes. These counts are not a prevalence estimate of unfair treatment.

Source: fairness_item_deep_dive.csv; fairness_response_breadth.csv; item_evidence_profile.csv; n = 327 per item.

Employee requests point to practical changes

Prompted, overlapping topics; counts describe requests, not incidents or dissatisfaction rates.

WITHIN THE FAIRNESS PROMPT

67 Career / learning requests
66 Recognition requests
64 Communication requests

73

Replies report no current concern.
Retain this contrasting evidence.

Request counts use all 327 records as the reference pool. Fairness-prompt examples refer to 308 nonblank answers.

Source: employee_voice_topic_summary.csv; fairness_prompt_topic_detail.csv; assistant_review_status.csv.

Three practices can make the two priorities workable

Practical enablers to incorporate in the pilot, rather than three separate change programmes.

Recognition and feedback

72.5%

Favourable on recognition.
179 records request recognition / feedback.

Offer specific feedback; explain how contributions are recognised.

Role clarity and backup

91 / 78

Records request roles/process changes / workload-boundary changes.

Define critical task owners, backup and escalation expectations.

Visible follow-through

79.8%

Favourable on listening and action.
134 records request voice / follow-through.

Acknowledge concerns, assign an owner and give the next update.

Source: item_evidence_profile.csv (RES4, CRE5); employee_voice_topic_summary.csv; final_focus_evidence_and_actions.csv.

Pilot two changes with clear accountability

Start with a bounded workflow and agreed pilot roles; verify the operational problem first.

P1 / Cross-team execution

PROPOSED ACCOUNTABLE OWNER

Operations / functional head

01 Map one handover with both sides.

02 Define information, recipient and backup.

03 Use acknowledgement and escalation.

By Day 30: documented handover types and assigned owners.

P2 / Fair people decisions

PROPOSED ACCOUNTABLE OWNER

HR head + business decision owners

01 Review appraisal, progression and rewards.

02 Publish understandable pilot-role criteria.

03 Explain decisions and the review route.

By Day 30: accessible criteria and review route for all pilot roles.

Specific work-condition or treatment accounts require confidential verification through the relevant existing routes.

Source: implementation_roadmap_0_90_days.csv (G0, P1-A/B/C, P2-A/B/C); proposed actions, not approved commitments.

A 90-day pilot turns the findings into a decision

Day 0 begins at organisational approval, not at the assignment deadline.

DAYS 0–14

Verify and baseline

Choose one workflow.
Review existing criteria.
Agree outcome targets.

HR + functional owners

Gate: approve baseline

DAYS 15–30

Make the pilot ready

Assign owners / backup.
Publish pilot-role criteria.
Start feedback / action log.

Pilot managers + HR

Gate: continue or adapt

DAYS 31–60

Run and improve

Review delays and rework.
Audit decision explanations.
Check usefulness and burden.

Workstream owners

Gate: review progress

DAYS 61–90

Evaluate and decide

Repeat selected pulse items.
Review process and resources.
Preserve pride and support.

Sponsor + HR + owners

Gate: scale, adapt or stop

Source: implementation_roadmap_0_90_days.csv; roadmap_decision_gates.csv; all standards and owners are proposals.

Measure process quality and employee experience

Separate proposed operating standards from outcome targets that still need a pilot baseline.

WORKSTREAM	PROPOSED PROCESS CHECK	EXPERIENCE CHECK / CURRENT REFERENCE
Cross-team work	≥95% handover completeness by Day 60; timeliness target after baseline.	Repeat CAM2 / CAM4. Current: 82.3% / 80.1% favourable.
People decisions	100% pilot-role criteria access by Day 30; review reasons and exceptions.	Repeat FAI1 / FAI3 / FAI5. Current: 76.1% / 74.6% / 75.5%.
Recognition	Offer each eligible pilot employee feedback each 30-day cycle.	Repeat RES4 / CAM5. Current: 72.5% / 72.8%.
Listening / action	Normal concerns: acknowledge ≤2 business days; owner / update date ≤5.	Repeat CRE5; ask if useful change was seen. Current: 79.8%.

Set numerical outcome targets by Day 14. Review at Days 60/90; retain PRI1 pride and CAM1 support as guardrails.

Source: roadmap_kpi_dictionary.csv; roadmap_decision_gates.csv; whole-study survey references are not pilot baselines.

Approve a focused pilot, then scale on evidence

A practical next step grounded in the current response pool.

01 Confirm a bounded scope

One cross-functional workflow and clearly defined pilot roles.

02 Name owners and provide capacity

Executive sponsor, HR lead and accountable functional owner.

03 Approve the baseline and review gates

14 days to agree measures and targets; Day 90 to scale, adapt or stop.

Protect pride and mutual support while making cross-team work and people decisions more dependable.

Source: FINAL_ANALYSIS_SYNTHESIS.md; implementation_roadmap_0_90_days.csv; roadmap_decision_gates.csv.

Methods were selected for the decision

The notebook contains the full research trail and methodology reference.

METHOD	PURPOSE / USE	BOUNDARY
Audit + distributions	Check source, wording, valid n and category shares.	Supplied records; population coverage unknown.
Means + diagnostics	Summarise blocks; alpha / rank associations explored.	Descriptive scores; coherence ≠ validity or cause.
Paired comparisons	Compare own-team and cross-team in each record.	Shows a pattern, not which workflow causes it.
Contextual topic coding	15 overlapping topics with separate stance/status.	Assistant interpretation; human validation pending.
Bigrams / trigrams	Find recurring phrases and navigate comments.	No automated sentiment or theme-validity claim.
Topic network	Explore same-answer topic co-mentions.	Prompt-sensitive; not a causal or employee network.
Sensitivity + restraint	Check exclusions; avoid redundant fuzzy scoring.	Exclusion is not bias correction; no attrition model.

Source: ANALYSIS_FROM_DATA_TO_ACTION.md §12; notebooks/00_data_understanding_eda.ipynb, final methodology cell.

Keep the results and their limits together

Sensitivity checks inform interpretation; they do not turn a descriptive survey into a causal study.

RATING SENSITIVITY

ITEM	ALL RECORDS	EXCLUDING IDENTICAL RATINGS
Recognition / RES4	72.5%	67.4%
Consistency / FAI3	74.6%	70.0%
Cross-team / CAM2	82.3%	79.1%
Pride / PRI1	92.4%	91.2%

COMMENT REVIEW STATUS

568 Unique comments reread

53 Coding / status decisions revised

75 Cases still need context confirmation

Independent human validation remains outstanding.

Selected favourable shares: n = 327 primary; n = 273 after exclusion. Primary reporting retains all records.

Source: item_evidence_profile.csv; coding_review_before_after.csv; assistant_review_status.csv; analysis guide §4–8.

Use group patterns to guide listening, not to assign blame

Selected descriptive examples; group composition and response selection may influence differences.

SCOPE	VALID n	OWN-TEAM 4–5 / CROSS-TEAM 1–3	≥1 FAIRNESS ITEM AT 1–3
Full study	327	45 / 327 · 13.8%	137 / 327 · 41.9%
Tenure: 3–5 years	53	11 / 53 · 20.8%	27 / 53 · 50.9%
Customer Service	51	10 / 51 · 19.6%	29 / 51 · 56.9%

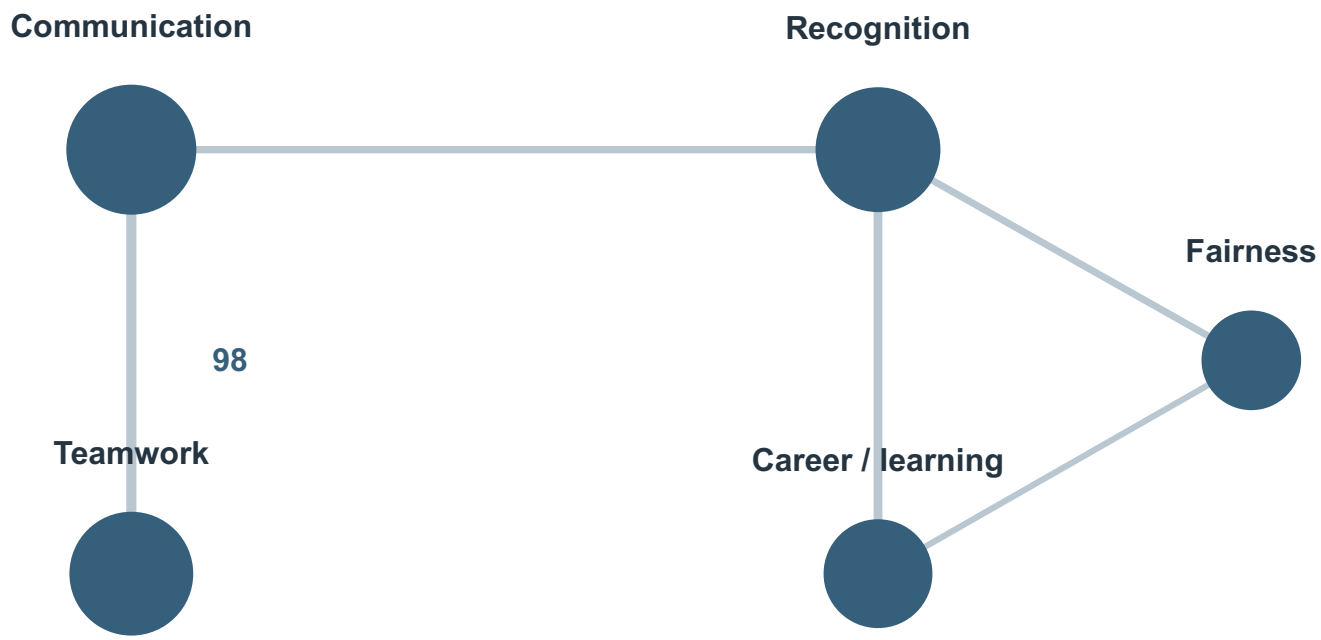

Follow up with contrasting experiences and verified work examples before choosing the pilot workflow.

1–3 includes Sometimes. These examples do not establish department effects, causes or fairness-incident prevalence.

Source: focused_group_profile.csv; cross_team_fairness_overlap.csv; whole-study n = 327; selected groups n ≥ 10.

The topic map helps organise discussion

VOSviewer-inspired exploration of same-answer co-mentions; not a causal map or a native VOSviewer run.

READ WITH THE PROMPTS

Communication × teamwork

98 co-mentions; 85 arise from the teamwork prompt.

Fairness × career

46 co-mentions; 41 arise from the fairness prompt.

Selected excerpt: node area reflects record support; line width indicates co-mentions. Positions are schematic.

Source: topic_network_edges.csv; topic_network_parameter_sensitivity.csv; reports/network/topic_network_data.json.
