Proud people. Fairer decisions. A listening loop that closes.

An evidence-based pathway for fair, explainable people decisions, visible follow-through and smoother handovers.

327 responses · 30 rating items · 1,892 comments

30 OCTOBER 2026 / TISS

Source: Your Voice master survey; analysis snapshot 30 October 2026.

Protect pride. Make people decisions fair and visible. Close the listening loop.

Two priorities backed by all four sources of evidence, plus one targeted operational fix.

PROTECT

Pride, belonging and own-team support

92.4% proud to work here · 90.2% feel they belong · 91.1% helped by own team.

PRIORITY 1

Fair, explainable people decisions, growth and recognition

The 5 lowest-scoring questions. Fairness is the block most linked to staying and recommending (31%).

PRIORITY 2

Leaders listen and visibly act

Top actionable link to outcomes · top HR request (24%) · most-raised 'one change'.

TARGETED FIX

Cross-team handovers, starting in Customer Service

45 rate their own team well but cross-team work 1–3; lowest in Customer Service.

One 90-day pilot · three workstreams · named owners · an anonymous pulse at Day 0 and Day 90.

Source: item_evidence_profile.csv; priority_matrix.csv; priority_triangulation.csv; driver_model_summary.csv; group_hotspots.csv.

Positive overall, and noticeably less so when people stay anonymous

Read every headline figure next to its anonymous counterpart.

INTEND TO STAY 3–5 YEARS

87.5%

All 327 respondents

78.0%

100 anonymous respondents

WOULD RECOMMEND AS A GREAT PLACE TO WORK

89.3%

82.0%

On the six fix-first questions, named respondents are 82% favourable and anonymous respondents 71%.

HOW TO READ THIS DECK

- 327 responses. Headcount was not supplied, so the response rate is unknown.
- Favourable = 4–5 (Usually / Almost always). 3 = Sometimes, not neutral.
- 54 people (16.5%) gave the same answer to all 30 questions; the priority order is unchanged without them.
- Comments were coded with AI assistance and re-reviewed once; not independently validated.
- Links to outcomes are associations from one survey, not proven causes.

The gap fits people being more guarded when named, but those who chose to name themselves may also differ.

Source: named_vs_anonymous.csv; item_evidence_profile.csv; survey_clean.csv; notebook Step 7.4.

Pride and helpful colleagues are assets to protect

Improvement should build on what employees already value.

119 people name their team or colleagues as what to never lose. Pride also moves closely with intending to stay.

Source: item_evidence_profile.csv (PRI2, PRI1, CAM1); employee_voice_topic_summary.csv (preserve topic t); notebook §8.

Fairness is the weakest survey block

Favourable share of answers per block; mean on the 1–5 scale.

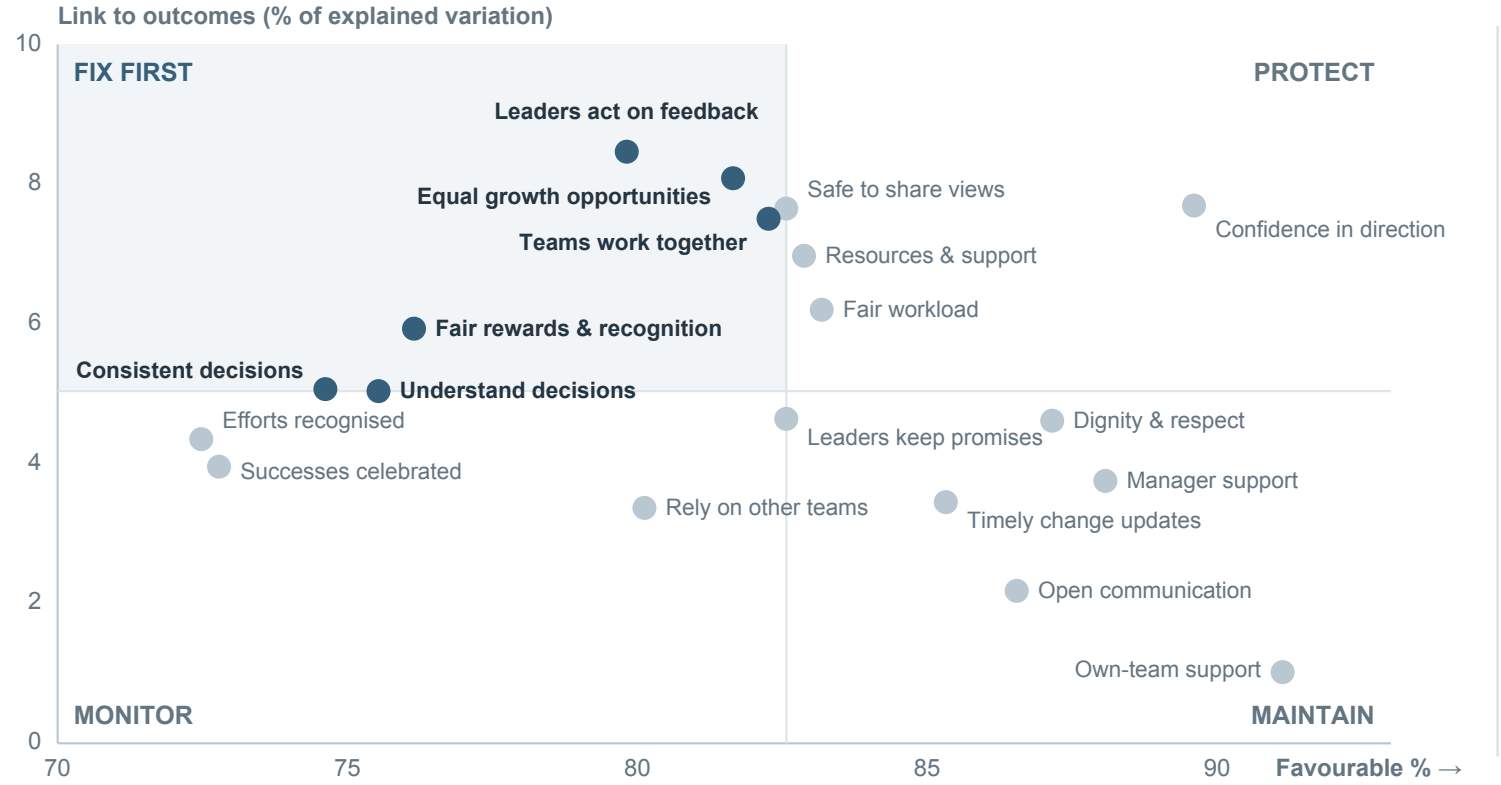

SURVEY BLOCK	FAVOURABLE SHARE / 0–100%	MEAN / 5
Pride	91.2%	4.58
Overall experience	89.4%	4.48
Credibility	84.8%	4.35
Camaraderie	83.3%	4.35
Respect	82.6%	4.32
Fairness	**78.2%**	4.17

Fairness is also the block most linked to recommending, satisfaction and staying: 31% of the explained variation.

Source: survey_clean.csv; five items per block; 1,635 valid answers per block; equal-weight working means.

Six questions matter most and score below the median: fix these first

Link to recommend / satisfied / stay 3–5 years (relative weights, $R^2 = 0.65$) against the survey's favourable share; 19 actionable questions.

FIX FIRST / SURVEY FAVOURABLE %

Consistent decisions	74.6%
Understand decisions	75.5%
Fair rewards & recognition	76.1%
Leaders act on feedback	79.8%
Equal growth opportunities	81.7%
Teams work together	82.3%

Read as tiers: intervals overlap. Order unchanged without straight-liners.

Recognition scores lowest but links weakly overall; among anonymous respondents it rises into the top tier, so it joins Priority 1.

Source: priority_matrix.csv; driver_model_summary.csv; notebook Step 7.1. Pride and belonging excluded as near-outcomes.

Two themes are backed by all four sources of evidence

Each source has a different weakness; a priority needs several of them to agree.

THEME	LOWEST SCORE	OUTCOME LINK	HR CHOICE	'ONE CHANGE'	DECISION
Fair people decisions & growth	● #3 of 30	● 75% top-5	● 16%	● 56 people	**Priority 1**
Leaders listen and act	● #6 of 30	● 71% top-5	● 24%	● 97 people	**Priority 2**
Recognition	● #1 of 30	○ 4% top-5	◔ 9%	● 60 people	**Inside Priority 1**
Cross-team collaboration	◔ #7 of 30	● 64% top-5	—	○ 16 people	**Targeted pilot**
Support with problems	○ #16 of 30	○ 9% top-5	● 20%	◔ 36 people	**Via listening loop**
Workload & role clarity	○ #13 of 30	◔ 37% top-5	○ 6%	● 63 people	**Inside handover pilot**
Pay, benefits & facilities	—	—	● 16%	◔ 37 people	**Annual review**

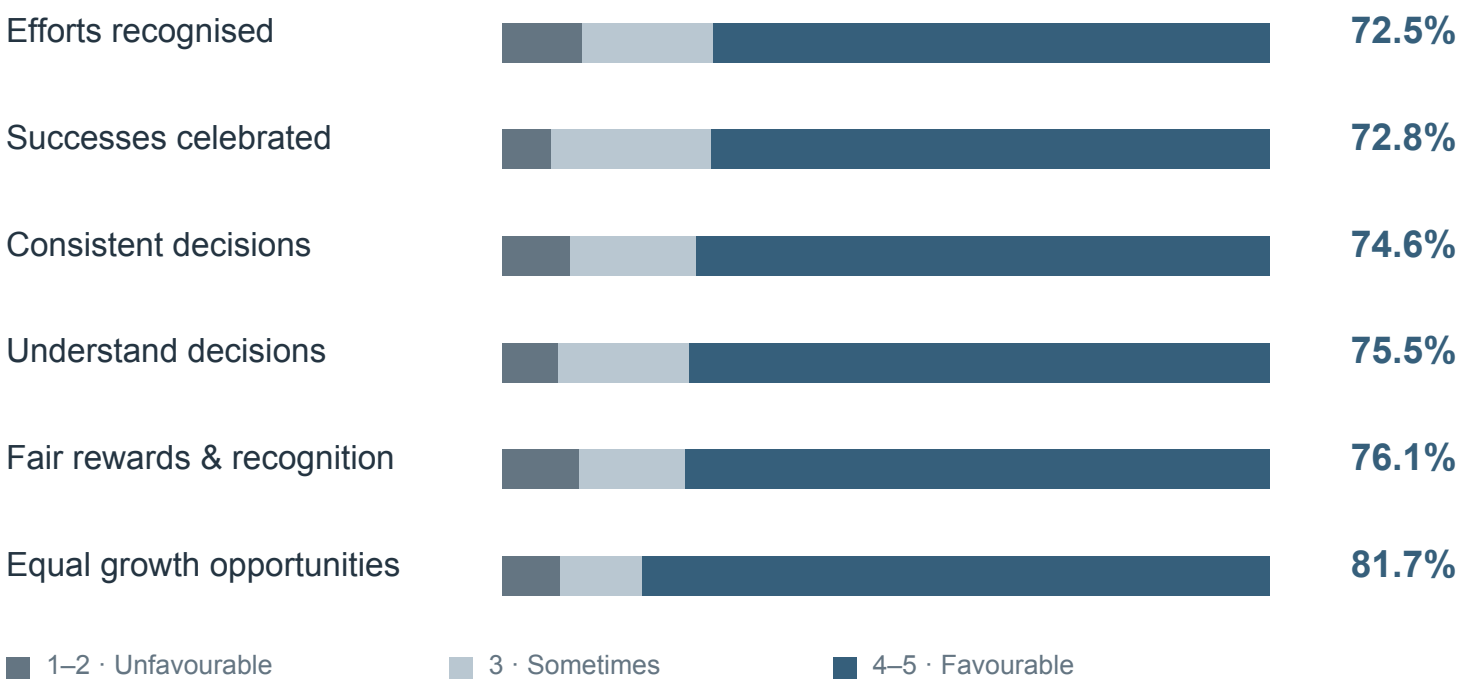

● Strong ◔ Medium ○ Weak — = no matching question or option

Score: rank of the lowest question · Outcome link: share of 500 resamples where a question is a top-5 driver · HR: % choosing it · One change: people raising it.

Source: priority_triangulation.csv; priority_matrix.csv; hr_priority_counts.csv; one_change_topics.csv; grading rules fixed in notebook Step 7.3.

Make people decisions fair, explainable and visible

The five lowest-scoring questions in the survey, plus growth opportunities, a top link to outcomes.

31%

of the explained link to staying and recommending comes from Fairness, the largest block

51

chose 'help employees progress in their careers' as HR's one fix

> “Inconsistent performance evaluations and opaque promotion criteria.”

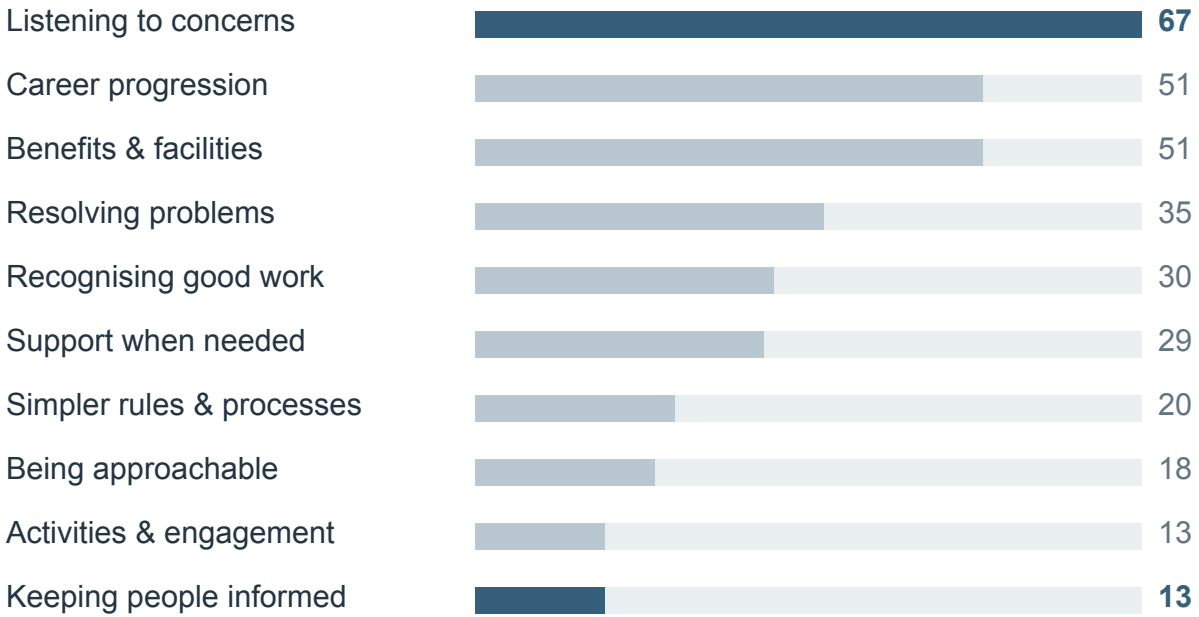

137 of 327 rated at least one fairness question 1–3. That includes Sometimes, so it is breadth, not the rate of unfair treatment.

Source: item_evidence_profile.csv; driver_model_summary.csv; hr_priority_counts.csv; fairness_response_breadth.csv; quote verbatim, de-identified.

Leaders listen, and visibly act on what they hear

The most common HR request, the top actionable link to outcomes, and the most-raised change.

IF HR COULD DO ONE THING BETTER / N = 327

79.8%

say leaders act on feedback: the top actionable link to staying and recommending

97

people ask for better communication or follow-through as their 'one change', more than any other theme

> “Employees’ problems and suggestions should be heard and appropriate action taken promptly.”

The ask is not more announcements. It is visible proof that raising something leads to a response.

Source: hr_priority_counts.csv; priority_matrix.csv (CRE5); priority_triangulation.csv; quote verbatim, de-identified.

Start where the gaps are largest: Customer Service and 3–5-year staff

% favourable on the priority questions by group; darker = lower. Groups with n ≥ 10.

GROUP (n)	FAIR DECISIONS	GROWTH	LISTEN & ACT	RECOGNITION	CROSS-TEAM	STAY 3–5 YRS
All respondents (327)	75	82	80	72	82	87
Customer Service (51)	**64**	**69**	**69**	**57**	**75**	**76**
Sales (54)	75	76	74	72	80	87
Documentation (59)	77	81	85	81	85	92
Finance & Accounts (38)	85	92	82	84	89	92
Operations (36)	88	94	89	86	97	92
0–3 years (124)	73	84	79	73	80	85
3–5 years (53)	68	85	75	66	77	79
5–10 years (56)	74	77	84	73	79	89
10–15 years (41)	92	90	93	85	100	100
15+ years (53)	77	72	72	66	83	91

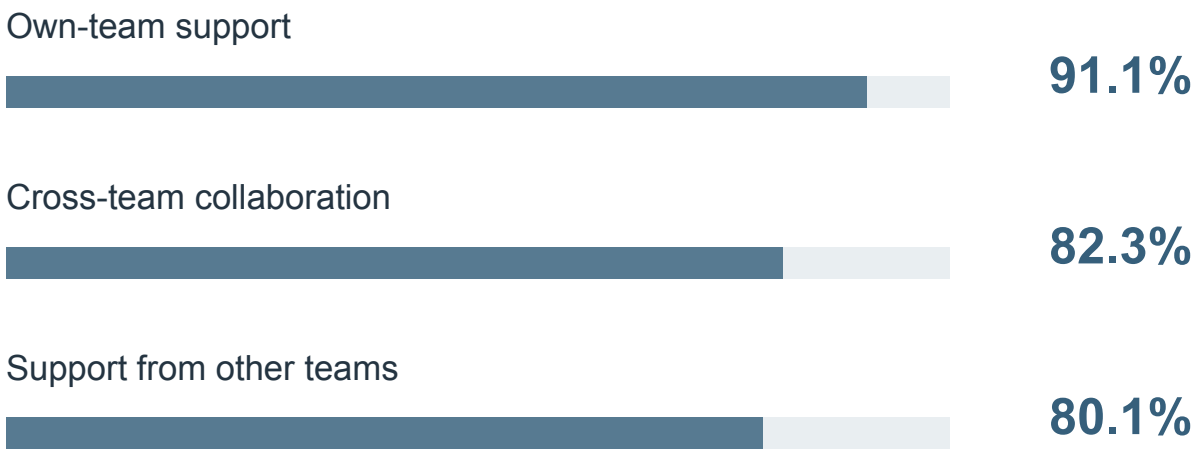

Women are 9–13 points below men on fair decisions, growth, listening and recognition (n = 67 vs 259).

Source: group_hotspots.csv; notebook Step 7.5. Smaller departments and the mixed 'Other' group not shown.

Cross-team handovers: a real but narrower gap to fix where it bites

Own team versus other teams in the same responses. Ranks 9th of 30, and rarely raised unprompted.

FAVOURABLE SHARE

45

Own team favourable; cross-team 1–3

13.8% of 327 respondents; only 16 show the reverse.

Own team / cross-team	1–3	4–5
1–3	13	16
4–5	45	253

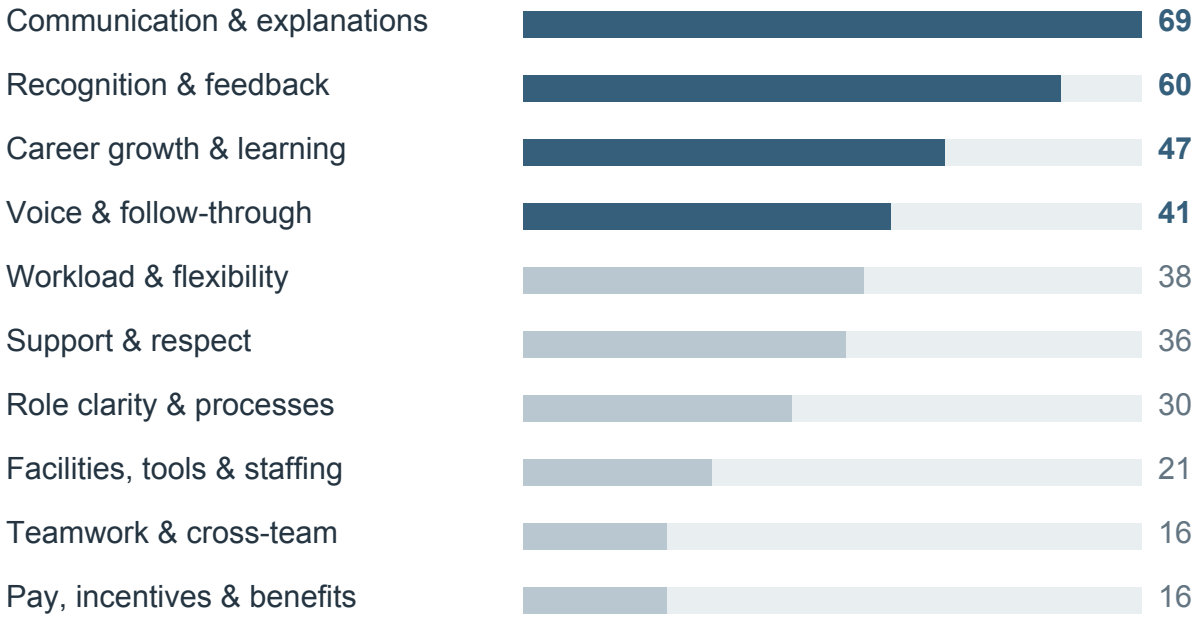

Customer Service is lowest on cross-team work (75%). Start the handover pilot there; verify the actual workflow first.

Source: cross_team_deep_dive.csv; cross_team_paired_detail.csv; group_hotspots.csv; CAM1 × CAM2; n = 327.

In their own words, people ask for communication, recognition and growth

'If you could make one change…', the only question that names no topic. 315 answers; one answer can raise several topics.

TOPICS RAISED / PEOPLE

HEARD, BUT OUTSIDE A 90-DAY PILOT

Pay, benefits and facilities

51 people (15.6%) chose this as HR's one fix. Route it to the annual compensation and facilities review, and say so publicly.

FIX THE SURVEY ITSELF

Drop the name field

69% gave their name, and anonymous respondents are about 11 points less favourable. Also collect headcount so a response rate can be reported.

Comments were coded with AI assistance and re-reviewed once; counts may shift slightly after independent validation.

Source: one_change_topics.csv; hr_priority_counts.csv; priority_triangulation.csv; named_vs_anonymous.csv.

One 90-day pilot, three workstreams, clear accountability

Built on existing processes and tools; starting in Customer Service plus one comparison area.

P1 / Fair decisions & recognition

OWNER

HR head + business heads

01 Publish appraisal, promotion and reward criteria for pilot roles.

02 Record and share the reason for each decision; offer a review route.

03 Managers give each person specific recognition every month.

Effort: medium · existing HR processes

Day 30: criteria published for all pilot roles.

P2 / Listen and act

OWNER

Leadership sponsor + HR

01 Log each raised concern with an owner and next-update date.

02 Publish a monthly 'you said, we did' update.

03 Hold skip-level listening sessions, Customer Service first.

Effort: low · leadership time, no new system

Day 30: log live; first monthly update sent.

Pilot / Cross-team handover

OWNER

Operations head + both team leads

01 Map one Customer Service handover with both sides.

02 Define required information, receiver and backup.

03 Acknowledge receipt; escalate when overdue.

Effort: low–medium · reuse existing tools

Day 30: checklist and owners agreed.

Specific accounts about working conditions or treatment need confidential verification through existing routes.

Source: implementation_roadmap_0_90_days.csv (adapted to the revised priorities); proposed actions, not approved commitments.

A 90-day pilot turns the findings into a decision

Day 0 begins at organisational approval, not at the assignment deadline.

DAYS 0–14

Verify and baseline

Pick pilot area (Customer Service first).
Review current criteria.
Run anonymous baseline pulse.

HR + functional owners

Gate: approve scope and targets

DAYS 15–30

Make the pilot ready

Publish criteria; assign owners.
Open the concern-to-action log.
Agree the handover checklist.

Pilot managers + HR

Gate: continue or adapt

DAYS 31–60

Run and improve

Monthly recognition and updates.
Weekly handover exception review.
Check burden and usefulness.

Workstream owners

Gate: review progress

DAYS 61–90

Evaluate and decide

Repeat the anonymous pulse.
Compare process measures.
Check pride and belonging held.

Sponsor + HR + owners

Gate: scale, adapt or stop

Source: implementation_roadmap_0_90_days.csv; roadmap_decision_gates.csv (adapted to the revised priorities); all standards and owners are proposals.

Measure the process and whether employees notice

Process checks show the pilot ran; repeated anonymous questions show whether it helped.

WORKSTREAM	PROCESS CHECK	EXPERIENCE CHECK / SURVEY
Fair decisions & recognition	Criteria published for 100% of pilot roles by Day 30; a reason recorded for every decision; monthly recognition.	FAI1 / FAI3 / FAI5 / RES4: 76 / 75 / 76 / 72%. Indicative: +5 points by Day 90.
Listen and act	Concerns acknowledged within 2 business days; owner and update date within 5; monthly 'you said, we did'.	CRE5: 79.8%. Indicative: +5 points; ask 'did you see a useful change?'
Cross-team handover	≥95% of in-scope handovers complete by Day 60; timeliness target set after the baseline.	CAM2 / CAM4: 82.3 / 80.1% (Customer Service CAM2 75%).
Guardrails	No extra reporting burden beyond the agreed logs.	Should not fall: pride 92%, own-team support 91%, stay 87% (anonymous 78%).

Measure with an anonymous pulse; report n and the anonymous share. Confirm numerical targets at Day 14.

Source: roadmap_kpi_dictionary.csv; item_evidence_profile.csv; group_hotspots.csv; named_vs_anonymous.csv. Targets are indicative.

Three decisions to start on Monday

A bounded, measurable pilot rather than a broad programme.

01

Approve one 90-day pilot

Fair decisions and recognition, the listen-and-act loop, and one Customer Service handover.

02

Name owners and protect their time

Leadership sponsor, HR head and Operations head; one review per month.

03

Run the next survey anonymously

Remove the name field; baseline pulse in the first 14 days, repeated at Day 90.

Protect pride and belonging while making people decisions fairer and showing employees they were heard.

Source: FINAL_ANALYSIS_SYNTHESIS.md; implementation_roadmap_0_90_days.csv; roadmap_decision_gates.csv; notebook Step 7.6.

Methods were selected for the decision

The notebook contains the full research trail and methodology reference.

METHOD	PURPOSE / USE	BOUNDARY
Audit + distributions	Check source, wording, valid n and category shares.	Supplied records; population coverage unknown.
Means + diagnostics	Summarise blocks; alpha and rank associations explored.	Descriptive scores; coherence ≠ validity or cause.
Relative-weights drivers	Share outcome R^2 across 19 actionable items; 500 bootstraps.	Associations; halo and ceiling effects; read as tiers.
Four-source evidence check	Score, outcome link, HR choice and 'one change' comments.	Grading thresholds are project rules set in advance.
Paired comparisons	Compare own-team and cross-team in each record.	Shows a pattern, not which workflow causes it.
Contextual topic coding	15 overlapping topics; bigrams/trigrams for navigation.	AI-assisted interpretation; human validation pending.
Topic network	Explore same-answer topic co-mentions.	Prompt-sensitive; not a causal or employee network.
Sensitivity checks	Without straight-liners; anonymous only; comment re-review.	Exclusion is not bias correction; no attrition model.

Source: ANALYSIS_FROM_DATA_TO_ACTION.md §12; notebooks/00_data_understanding_eda.ipynb, Step 7 and final methodology cell.

The priorities hold up under the main robustness checks

Sensitivity checks inform interpretation; they do not turn a descriptive survey into a causal study.

FAVOURABLE SHARE UNDER EACH CHECK

QUESTION	ALL	NO STRAIGHT-LINERS	ANONYMOUS
Recognition / RES4	72.5%	67.4%	68.0%
Consistency / FAI3	74.6%	70.0%	68.0%
Listen and act / CRE5	79.8%	76.2%	75.0%
Cross-team / CAM2	82.3%	79.1%	75.0%
Pride / PRI1	92.4%	91.2%	89.0%

DRIVER RANKING STABILITY

ρ = 1.00 without straight-liners (n = 273)

ρ = 0.59 anonymous only (n = 100): recognition rises, cross-team drops

COMMENT REVIEW

568 comments reread

53 decisions revised

75 cases still need context

Independent human validation of the comment coding remains outstanding.

Source: item_evidence_profile.csv; priority_matrix.csv; named_vs_anonymous.csv; coding_review_before_after.csv; assistant_review_status.csv.

Use group patterns to guide listening, not to assign blame

Selected descriptive examples; group composition and response selection may influence differences.

SCOPE	VALID n	OWN-TEAM 4–5 / CROSS-TEAM 1–3	≥1 FAIRNESS ITEM AT 1–3
Full study	327	45 / 327 · 13.8%	137 / 327 · 41.9%
Tenure: 3–5 years	53	11 / 53 · 20.8%	27 / 53 · 50.9%
Customer Service	51	10 / 51 · 19.6%	29 / 51 · 56.9%

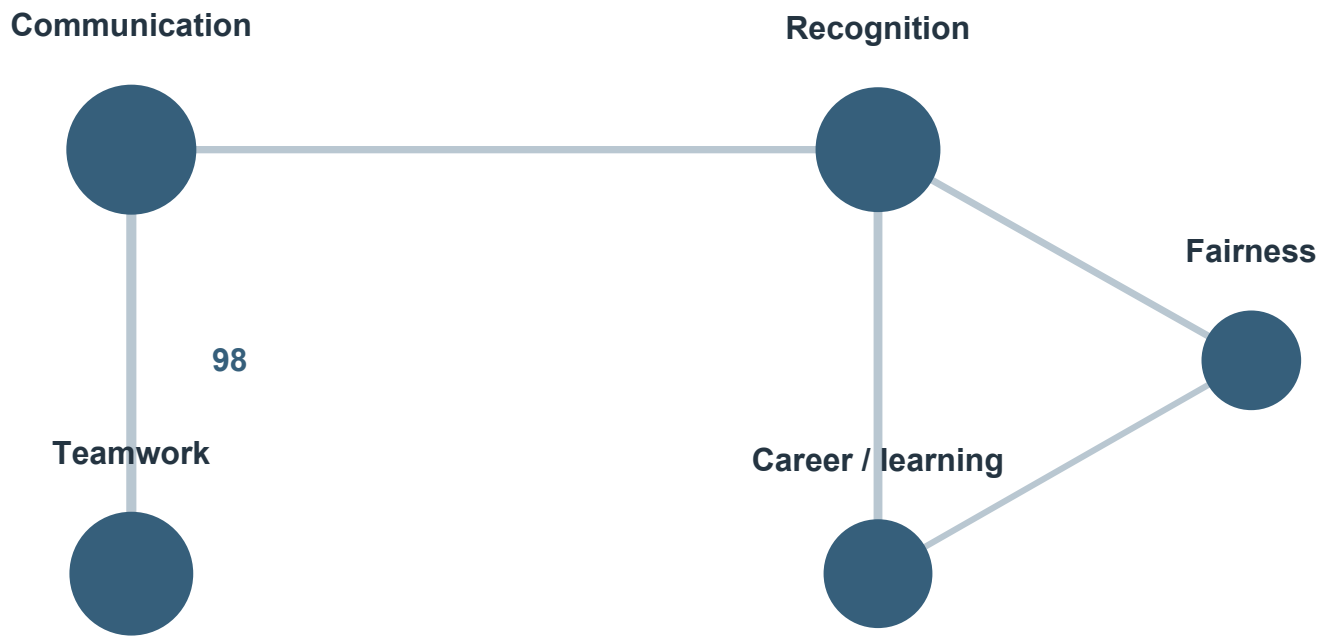

Follow up with contrasting experiences and verified work examples before choosing the pilot workflow.

1–3 includes Sometimes. These examples do not establish department effects, causes or fairness-incident prevalence.

Source: focused_group_profile.csv; cross_team_fairness_overlap.csv; whole-study n = 327; selected groups n ≥ 10.

The topic map helps organise discussion

VOSviewer-inspired exploration of same-answer co-mentions; not a causal map or a native VOSviewer run.

READ WITH THE PROMPTS

Communication × teamwork

98 co-mentions; 85 arise from the teamwork prompt.

Fairness × career

46 co-mentions; 41 arise from the fairness prompt.

Selected excerpt: node area reflects record support; line width indicates co-mentions. Positions are schematic.

Source: topic_network_edges.csv; topic_network_parameter_sensitivity.csv; reports/network/topic_network_data.json.
